

Applied Kinesiology Class

Principles of AK

Applied Kinesiology gives you the ability to evaluate the body's function in a holistic model through muscle testing. AK is a diagnostic system founded and developed by a chiropractor. It is not a stand-alone diagnostic tool, but works best when combined with history, orthopedics and neurology. Students will be trained to incorporate their vast anatomy and physiological education in a specific and timely manner to help their patients recover. The 100 Hour Certification Course will give you the tools to enhance your palpation, adjusting, and nutritional studies. Dr. MCall is a graduate of Western States in both Chiropractic, as well as functional medicine and human nutrition masters. He is very excited to teach AK at Western States University, because he feels that AK is a great adjunct to an already great education.

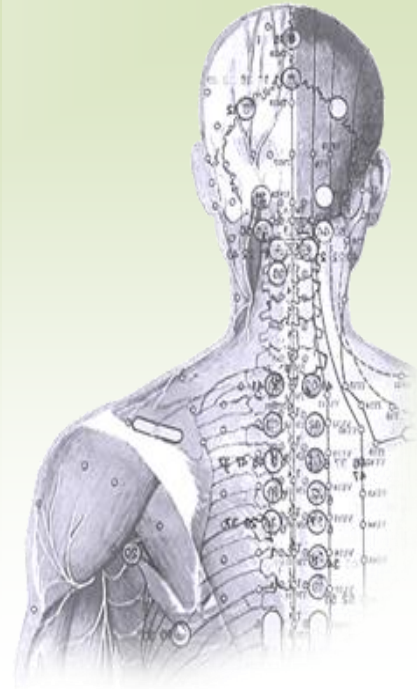

Over a course of 8 weekends, each session will comprise of lecture, demonstration and applicable technique. Each class builds upon concepts of earlier classes, so we highly recommend taking the entire course. However, participants are welcome to select single sessions if they prefer.

Enroll Online Now!

- Doctor: \$350 one weekend class / \$2400 full 8 weeks
- Faculty/Student/1st Year Doc: \$250 one weekend class / \$1600 full 8 weeks
