

Lebowitz Protocol- Treating The Complex Patient

Dr. Noah Lebowitz

Sunday, March 24, 2019 9AM-5PM

One day seminar taught by Noah Lebowitz DC will be held at Minneapolis Airport Marriott, Bloomington, MN

The class is well suited to both the newcomer to the Lebowitz protocol as well as physicians who have been following Dr. Michael Lebowitz's work for many years. A basic ability to perform manual muscle testing is necessary to utilize these techniques. Some of the topics to be covered:

- Dysbiosis (fungal, parasite, bacterial, viral,
- Lyme, etc)
- Coagulation Issues
- Food Reactions
- Lectin Sensitivities
- Chemical Intolerance
- Mycotoxins
- Biofilms
- SIBO
- Nutritional Deficiencies
- Organ Dysfunction
- EMF Issues

New techniques to help eliminate false negatives and false positives, which are both very common in muscle testing are discussed and demonstrated. There is also new material that will speed up testing and bring forth oftentimes hidden findings. The class comes with a full, easy to follow set of notes and Dr. Lebowitz is easily accessible to answer questions you may have after you have started implementing the material.

The technique was developed in the 1980's by Dr. Michael Lebowitz, a prolific writer having authored 4 books, over 60 articles, and a free monthly newsletter for over 19 years (you can subscribe and read back issues on [this site](#)). He attracts patients from around the globe and treats many professional athletes (MLB, NHL, NFL, cyclists, runners, boxers, ballet, etc.), entertainers, as well as many physicians and everyone else., When treating and correcting dysbiosis (fungus, parasites, bacteria, virus, etc.), food sensitivities, toxic metals and chemicals, nutrient deficiencies hormone imbalances, structural imbalances, and more, he has found that a majority of chronic and acute symptoms often resolve and the patient is restored to a better state of health.

Dr. Noah Lebowitz has been teaching with his father and on his own the last 4 years. He has a practice in Tacoma, WA and specializes in patients with chronic illness. He has also treated many professional athletes including NHL, MLB, PGA, etc. players. He routinely has patients flying in from out of state, and has made house calls across the USA and to other countries.
